Deliver Better Care and Control Costs with an Integrated Solution

An integrated, corrections-specific solution improves the delivery of medical, dental, and behavioral health services in all your facilities. In addition, you can achieve true integrated care because NextGen Healthcare solutions provide medical, behavioral, and dental content on a single platform that allows data to be shared among your clinicians. Other vendors must stitch disparate solutions together via interfaces that prohibit clinicians from sharing data.

Achieve or maintain NCCHC/ACA accreditation with NextGen Healthcare solutions. We incorporate the latest compliance knowledge and integrate the newest data capture and measurement options so you're ready to advance in this dynamic environment.

Your patients require comprehensive healthcare. Your EHR vendor should provide a comprehensive solution to meet their needs.

An Integrated EHR for Correctional Health

Improve care quality

To ensure care quality, you need corrections-specific tools and workflow. NextGen® Enterprise delivers corrections-specific content—including dental and behavior health templates—designed to help you:

- Easily document and schedule sick calls
- Support nurse protocols
- Document sick call visits easily
- Act on lab results quickly
- Foster proactive health maintenance and disease management
- Execute efficient, collaborative discharge planning

Gain fast ROI

To cut costs and increase funding opportunities, you need automated data collection and user-friendly reporting tools. Use NextGen Enterprise to:

- Reduce healthcare costs and avoid unnecessary litigation fees
- Create a full range of reports using an intuitive interface
- Enhance understanding of your inmate populations
- Manage your facility proactively
- Reduce population movement costs

Reduce risk

To reduce risk, you need to meet—or exceed—industry standards, improve overall documentation, ensure privacy, and solve transportation challenges. Achieve these goals with NextGen Enterprise as you:

- Comply with standards and guidelines from the NCCCHC, ACA, and BOP
- Streamline and automate documentation with a simple interface, ensuring accountability
- Improve health maintenance and disease management monitoring
- Reduce chart fragmentation

“A fully integrated patient record and care model for both systemic health and oral health is needed for health information technology standards, implementation, and interoperability to avoid discrepancies between records and to support quality of care, safety, and cost reduction initiatives.”

**Journal of the American Health Information
Management Association (AHIMA)**

Solutions for Dental Health

Achieve integrated care

Your dental management can provide better healthcare delivery when operations are fully integrated. NextGen® EDR—certified as an ONC-ATCB complete EHR by the Certification Commission for Health Information Technology (CCHIT®)*—is a solution that folds your dental operations into the rest of your corrections healthcare.

Full integration enables you to:

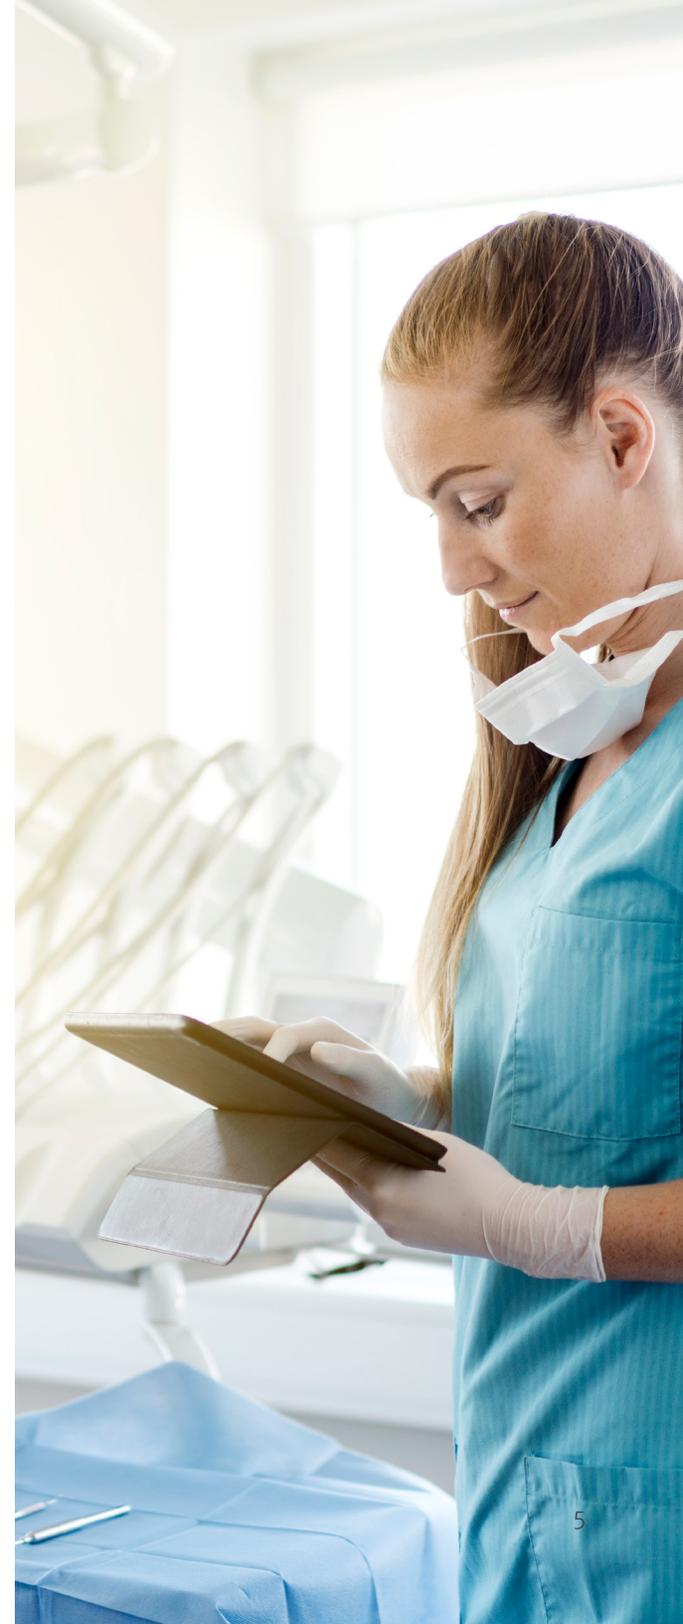

- Ensure all clinical staff are using the same comprehensive clinical record to make care decisions and write prescriptions
- Reduce the complexity of operations for improved manageability
- Support better treatment planning with open, integrated access to all patient data

Improve outcomes

A fully integrated care environment helps your dental staff improve clinical outcomes. NextGen Healthcare allows them to have access to all relevant clinical information regardless of which clinicians captured the original information. They are able to:

- Improve patient safety with access to essential clinical information
- Boost documentation quality while supporting national standards
- Simplify data entry for frequent activities and share consistent clinical information with healthcare staff

Solutions for Behavioral Health

NextGen® Behavioral Health Suite provides integrated medical, dental, and behavioral/mental health clinical records in a single, easy-to-use solution. With a comprehensive view of patient health and the ability to share information seamlessly, it streamlines workflow, improves clinical outcomes, and refines reporting.

Comprehensive templates

NextGen® Enterprise EHR—certified for behavioral health—is the only EHR that originates from a primary ambulatory EHR platform. Use CARF-compliant behavioral health-specific content, workflow, and educational materials to:

- Improve patient care and streamline behavioral health visits
- Quickly access lab orders, medications, and psychiatric history
- Tap into specialized HPI templates for depression, ADHD, and more

Find out why more than 130 correctional health facilities already collaborate with NextGen Healthcare.

New Challenges and Opportunities for Correctional Health

NextGen Enterprise EHR—certified for behavioral health—provides multispecialty and multifacility clinical content that includes pre-built medical, behavioral, and dental clinical workflows for use within state prison and county jail agencies.

Interoperable EHR systems and robust clinical content ensure continuity of care for people re-entering communities who may have mental illness, HIV/AIDS, hepatitis, or other serious conditions.
